

1. Clone Repository from:

<https://github.com/enaghiaei/Collectief-docker>

2. In ROOT directory run:

docker compose up

Root directory content:

3. Run <http://localhost:3050> in your browser to view COLLECTIEF client

4. Use the following credentials to log in

Edge Node User:

User: collectief4@gmail.com

Pass: 12345678

Facility Manager:

User: collectief3@gmail.com

Pass: 12345678

Cluster Manager:

User: collectief2@gmail.com

Pass: 12345678

MySQL:

To enter the database in the terminal of MySQL's container, use below command:

```
mysql -u root -p
```

and then enter root password from docker file.

Default is set to this value:

```
OuPfme45oAM#$6m6S8lqy4P!%QffaxlYFICnmP45zyaloZ5Zw=
```

once you have successfully logged in select collectief database with below command:

```
use collectief;
```

for see tables, use below command:

```
show tables;
```

***When change password in docker file, you need to delete container and create it again.**
